

WE PROVIDE TRANSFER POINT SOLUTIONS

Baker-Bohnert provides solutions to your transfer point problems by applying our extensive knowledge, specialized equipment, and field experience to your project.

We can help you eliminate problems resulting from:

- spillage and dust,
- seized idlers,
- build-up on pulleys,
- belt mistracking
- mis-applied components
- poor belt loading

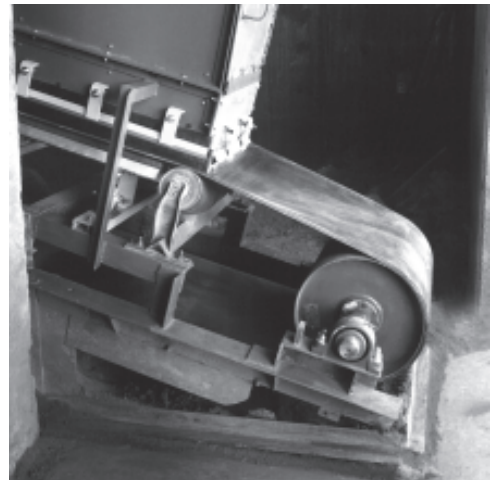

Our complete Solutions approach will help you:

- reduce downtime
- increase operating efficiency
- eliminate unnecessary maintenance
- create a cleaner operating environment

Call us today for turnkey engineering, design, and installation to solve your difficult transfer point problems.

PROBLEM: Spillage and dust cause significant problems leading to excessive maintenance and eventual component failure.

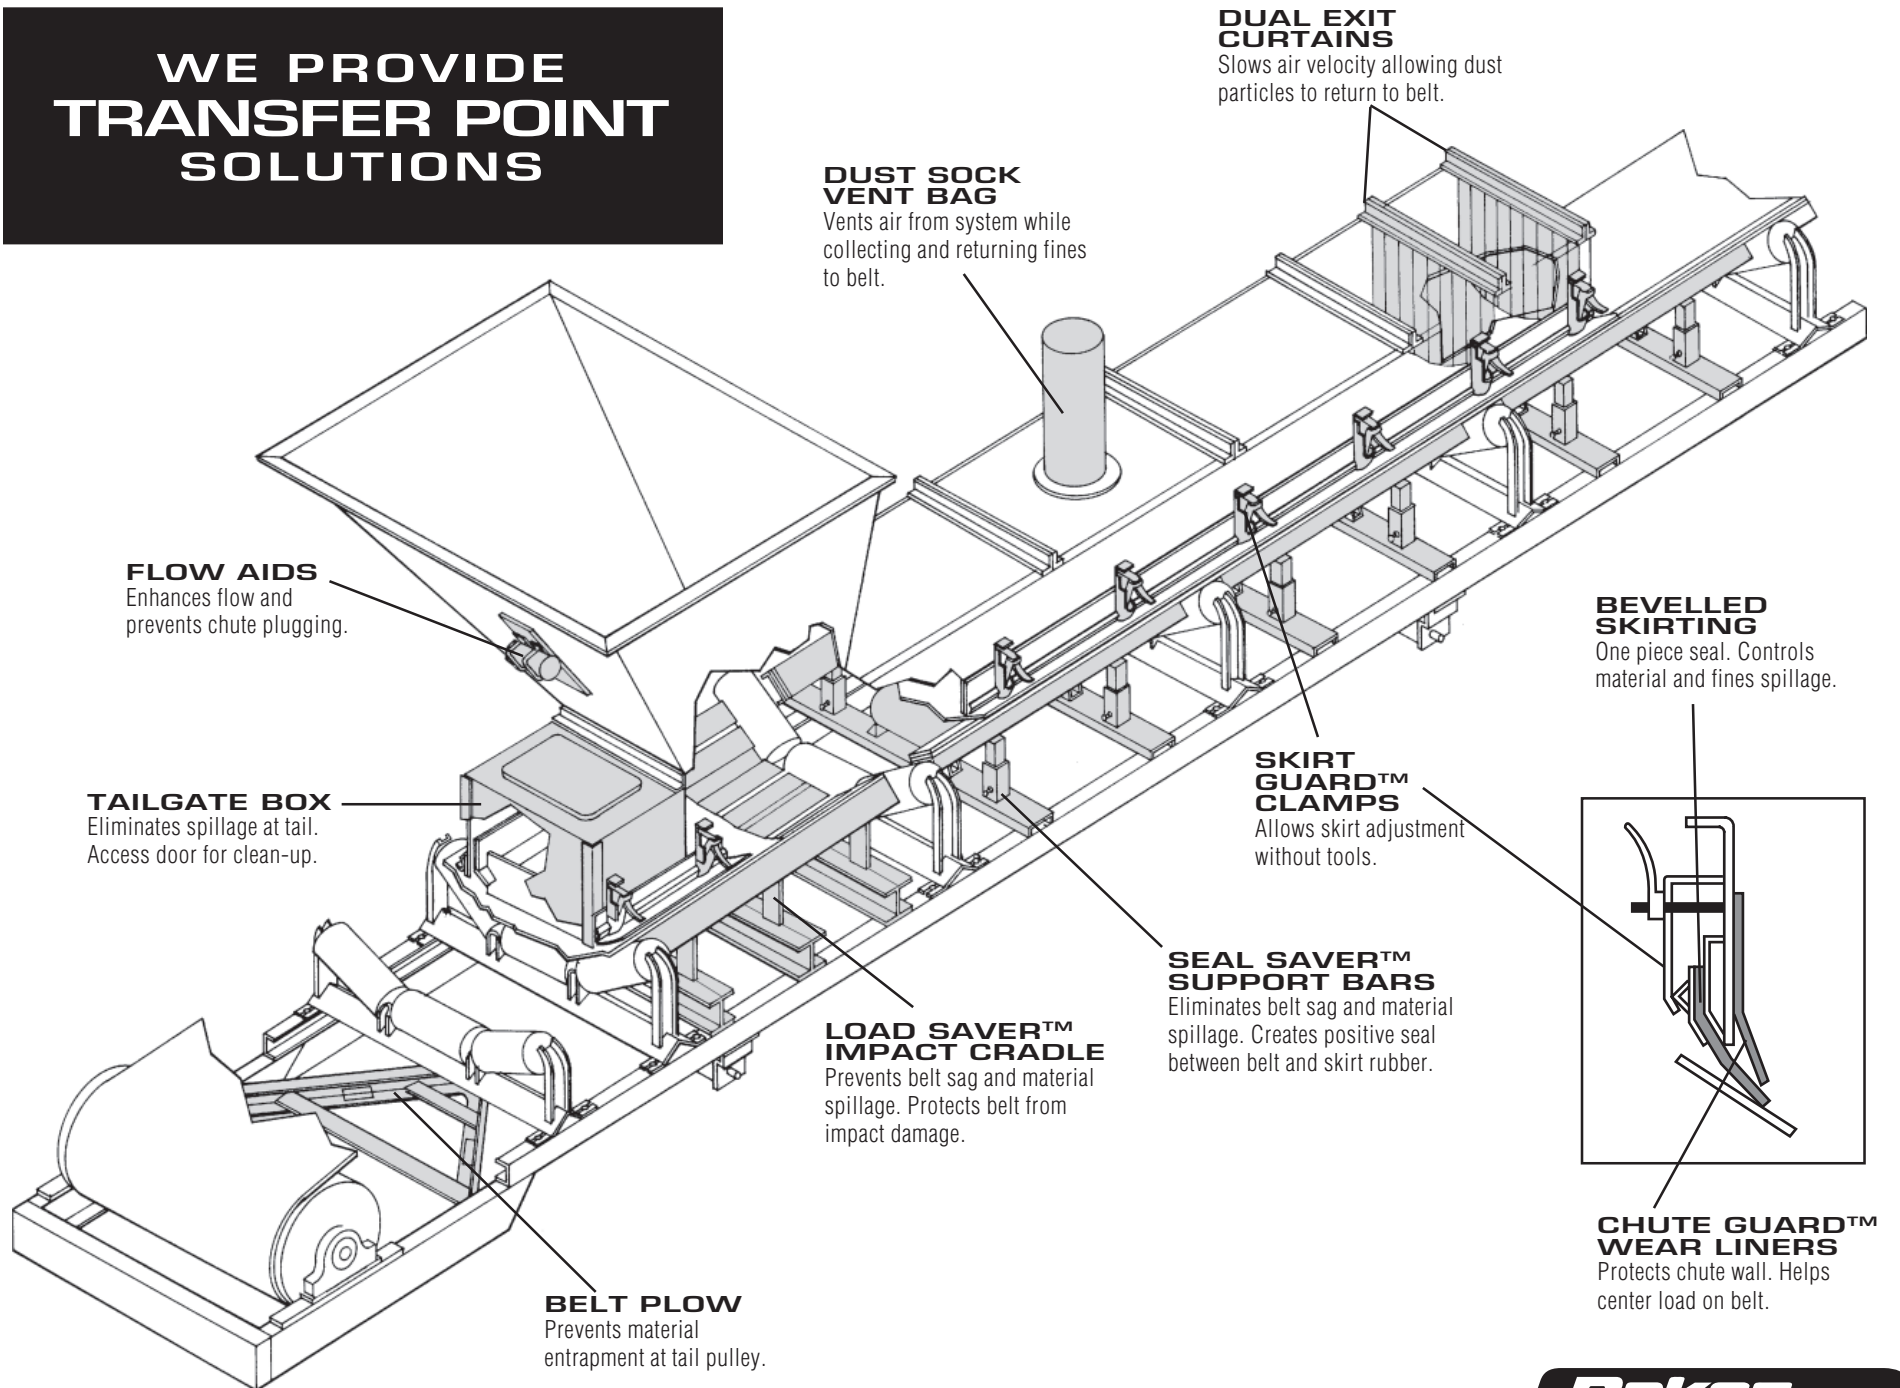

SOLUTION: Baker-Bohnert provides the knowledge, skills, and equipment to eliminate your transfer point problems.

WE PROVIDE TRANSFER POINT SOLUTIONS

FLOW AIDS
Enhances flow and prevents chute plugging.

TAILGATE BOX
Eliminates spillage at tail. Access door for clean-up.

BELT PLOW
Prevents material entrapment at tail pulley.

DUST SOCK VENT BAG
Vents air from system while collecting and returning fines to belt.

LOAD SAVER™ IMPACT CRADLE
Prevents belt sag and material spillage. Protects belt from impact damage.

SEAL SAVER™ SUPPORT BARS
Eliminates belt sag and material spillage. Creates positive seal between belt and skirt rubber.

SKIRT GUARD™ CLAMPS
Allows skirt adjustment without tools.

DUAL EXIT CURTAINS
Slows air velocity allowing dust particles to return to belt.

BEVELLED SKIRTING
One piece seal. Controls material and fines spillage.

CHUTE GUARD™ WEAR LINERS
Protects chute wall. Helps center load on belt.
